

REPORT

OF THE

BOARD OF ADMINISTRATORS

OF THE

CHARITY HOSPITAL

TO THE

GENERAL ASSEMBLY
OF THE STATE OF LOUISIANA

1910

NEW ORLEANS

THE
CHARITY HOSPITAL
 OF LOUISIANA
 WAS FOUNDED IN THE YEAR 1786
 BY
DON ANDRES ALMONASTER Y ROXAS,

To whose generous endowment, the munificence of the

LEGISLATURE OF THIS STATE,

and the liberality of the State of Pennsylvania, the community is indebted for the means of erecting this edifice, built in the year

1832,

His Excellency A. B. Roman, being Governor and Ex-Officio President of the Institution.

To record which and inscribe hereon the names and contributions of its distinguished benefactors,

THIS TABLET HAS BEEN ERECTED.

Etienne Bore, - - - - -	\$1,000 00	Robert Moore, - - - - -	\$ 5,000 00

BOARD OF ADMINISTRATORS.

HIS EXCELLENCY, JARED Y. SANDERS, EX-OFFICIO PRESIDENT.
E. S. LEWIS, M. D., VICE-PRESIDENT.

J. B. SINNOTT,	JOHN T. GIBBONS
THOMAS DOUGLAS,	HUNTER C. LEAKE,
LOUIS ED. VALLOFT, GEO. S. BEL, M. D.	
CHAS. A. FARWELL.	

FINANCE COMMITTEE.

HUNTER C. LEAKE, CHAIRMAN.	
THOMAS DOUGLAS,	J. B. SINNOTT.

HOUSE COMMITTEE.

LOUIS ED. VALLOFT, CHAIRMAN.	
JOHN T. GIBBONS,	CHAS. A. FARWELL.

MEDICAL COMMITTEE.

DR. GEO. S. BEL, CHAIRMAN.	
JOHN T. GIBBONS,	HUNTER C. LEAKE.

EXAMINING COMMITTEE.

DR. E. S. LEWIS,	DR. GEO. S. BEL,
DR. S. W. STAFFORD,	DR. J. A. DANNA,
	DR. C. G. COLE.

HOSPITAL OFFICERS.

DR. J. A. DANNA.....	House Surgeon
DR. S. W. STAFFORD.....	1st Assistant House Surgeon
DR. C. G. COLE.....	2d Assistant House Surgeon
L. P. DELAHOUSSAYE.....	Secretary and Treasurer
DR. O. L. POTIER.....	Pathologist
DR. M. COURET.....	Assistant Pathologist
JOS. P. WALKER.....	Chémist and Druggist
JAMES R. LEAKE.....	Clerk
JOHN PONDER.....	Engineer
STURGES Q. ADAMS.....	Attorney

RESIDENT STUDENTS.

From April, 1909, to May, 1911.

MR. EARLE BROWN.	MR. W. ALVIN LOVE.
MR. DAN C. DONALD.	MR. J. BROWNE LAROSE.
MR. ALEX. FICKLEN.	MR. HY. LEIDENHEIMER.
MR. FRANK M. FAGET.	MR. EDMOND N. LANDRY.
MR. M. J. GELPI.	MR. T. J. ST. MARTIN.
MR. C. M. HORTON.	MR. J. ARTHUR NEWMAN.
MR. E. L. KING.	MR. S. P. WISE.

From May, 1910, to May, 1912.

MR. L. F. BERIDON.	MR. S. C. JAMISON.
MR. S. L. CHRISTIAN.	MR. J. A. MAXWELL.
MR. W. L. CHILDS.	MR. H. E. NELSON.
MR. J. D. DAVID.	MR. J. I. PETERS.
MR. L. A. FORTIER.	MR. R. R. ROSS.
MR. R. B. HARRISON.	MR. H. L. STARRING.

INDOOR VISITING STAFF.

VISITING SURGEONS.

From April to October, 1910.

DR. C. W. ALLEN.	DR. W. LASSITER.
DR. J. BARNETT.	DR. F. A. LARUE.

Annual Report of the Vice-President, E. S. LEWIS, M. D.

To Governor J. Y. Sanders:

YOUR EXCELLENCY—The following digest of administrative and executive work done in the Hospital during the past year is herewith submitted. For further details you are respectfully referred to the appended reports of committees and officers.

Total cash receipts for the year were \$202,958.32, and were less by \$39,769 than receipts of 1909. The income from the regular sources of revenue was \$200,439.93, and includes \$11,250 of the State appropriation due in December, 1908, and credited to the income of 1909. Although the appropriation for 1910 exceeded that of 1909 by \$10,000, if that sum be deducted from the \$11,250 incidentally forming part of last year's income, the difference is only \$1,250 in excess of the revenues of 1909.

Among the most important contributing causes of this falling off, notwithstanding the increased appropriation, may be mentioned shortages from auction sales, slaughterhouse fees, rentals and licenses, amounting to \$7,235.96. Of the Special Fund there was on deposit on the 1st of January, 1911, \$40,911.95, and of the General Fund \$5,912.87.

Disbursements were \$204,707.80, and exceeded the income by \$4,267.87. This deficit was supplied from the Special Fund.

Since the month of February of last year \$17,411.95 was diverted from this fund to meet current expenses.

Disbursements for 1910 exceeded those of 1909 by \$1,659.37. In this connection it is well to mention that 1,740 more patients were admitted and treated than in 1909.

This, together with the high cost of foodstuff, greatly increased expenditures. An appraisement of hospital properties and inventories of the furnishings ordered by the Board and executed by Mr. Peter Gallagher estimates the valuation of the Hospital plant at \$1,630,860.18. All Hospital properties are covered by insurance.

During the year 12,098 patients were treated. This is the largest number ever recorded in the history of the Hospital. Of this number 9,700 were discharged, 1,579 died, and 819 remained over on the 1st of January, 1911. The whites numbered 6,719, the colored 4,594. Of the white adult males there were 3,778, and 561 boys; of white adult females, 1,999, and 381 girls. Of the colored adult males, 2,734, and 141 boys; of the colored adult females, 1,586, and 133 girls. In the maternity department there were 392 births. The gross mortality was 13 per cent., and the net 8 4/5 per cent., after deducting the deaths occurring soon after admission, which numbered 506.

In the out clinics 18,916 were treated, and 97,596 consultations were given. Emergency cases numbered 8,550; ambulance calls, 4,117; surgical operations, 4,117. Of these 1,319 were performed in the Delgado Memorial. In the Pathological Department 17,733 specimens were examined, and in the Pasteur Institute 635 were treated for suspected rabies infection.

The Registrar reports 11,410 tabulated histories.

The Training School for Nurses averaged 104 for the year. Of this number there were graduated 33 on the 10th of December, 1910.

In addition to the usual annual renovation of hospital properties, many improvements were made, of which the following are the most important:

The kitchen was enlarged and remodeled; the laundry supplied with additional machinery to meet needed requirements; two passenger elevators and three dumb-waiters were installed in the Main Building, and the entire flooring of the hall on the first floor was removed and replaced by ceramic tiling, which adds to appearances, and is far more sanitary.

At the last Board meeting a report of Dr. Bel, Chairman of the Medical Committee, was ordered to be incorporated with the Annual Report. It urges the erection of an isolation hospital for infectious and contagious diseases; of an additional story to the Main Building for the relief of congested wards; of a vacuum cleaning system, to prevent infection through dust; of a sterilizer for bedding; of a refrigerating plant for the preservation of the dead pending burial; of a service for hydro- and electro- therapy; of a building with modern conveniences for the Sisters; and of suitable dormitories for the employees. The installation of an ice and electric plant would also add to the efficiency of the service, and prove a saving in the end in the cost of ice and electric lighting.

Funds are, however, wanting to meet these requirements, which would make this institution the most perfect of its kind in this country. Meanwhile we may indulge in the hope that, with the growth of population and increase of wealth, means will be secured to effect at least the most urgent of the improvements required.

We gladly take advantage of this opportunity to express our appreciation and return our thanks to those who have rendered service to this Institution.

To Sister Agnes, for the judgment, tact and business qualities shown in the performance of her functions, aided by the good Sisters, whose zeal, devotion to duty and Christian virtues deserve the highest praise. To the able and efficient House Surgeon, Dr. J. A. Danna, whose qualifications as a surgeon and executive officer eminently fit him for the position he fills, and to his two assistants, Drs. S. W. Stafford and C. J. Cole, who second him with ability and zeal. To Capt. L. P. Delahoussaye, whose work has trebled under the new system of bookkeeping inaugurated by Auditor Smith. In the performance of the responsible and onerous duties of his office he has well earned the commendations of the Visiting Auditor and of the Board. To Mr. John Ponder, Chief Engineer, ever reliable, faithful and resourceful. To Mr. James R. Leake, Clerk, whose books are a model of neatness and painstaking.

To Mr. Jos. P. Walker, the efficient druggist, whose department is admirably and economically conducted.

To Drs. O. L. Pothier and M. Couret, his assistant in charge of the Pathological Department and Pasteur Institute. Their work is of material aid in diagnosis and treatment, and in preparing and applying the vaccine for rabies infection.

To the Registrar, Dr. Patton, whose clerically-recorded and tabulated histories of patients possess great value.

To the Visiting Staff, the Attorneys of the Board, the corps of Trained Nurses and the employees.

To generous donors, whose gifts have been utilized in improvements.

In closing, my esteemed colleagues, it is a pleasure to refer to our harmonious and friendly gatherings. The welfare of this Institution is your sole aim and ambition, and the duties devolving afford gratification and pleasure. To the House Committee falls the chief burden of labor, and to its indefatigable Chairman and earnest worker, Mr. Louis Ed. Valloft, chief credit is due.

Very respectfully,

E. S. LEWIS, M. D.

Annual Report of the House Committee.

NEW ORLEANS, LA., February 10, 1911.

To the Board of Administrators of the Charity Hospital of Louisiana, New Orleans, La.:

PREAMBLE.*

GENTLEMEN—Agreeable to a resolution of your Honorable Board Dr. Geo. S. Bel, Chairman of the Medical Committee of the Board of Administrators, prepared and presented a report showing the wants of the institution from a medical view.

The report was carefully prepared and specific in its references, but no mention was made as to the cost of such additions or improvements, either fixed or approximate, Dr. Bel appreciating that such matters would be attended to by the proper committee.

You were mindful of the fact that the financial condition of our affairs was such as to make it impossible at the moment to proceed with any one single improvement, regardless of its necessity, and were, therefore, all the more appreciative of the fact that to correct all the conditions set forth in Dr. Bel's report would approximate three-quarters of a million dollars, and were, therefore, beyond our immediate hopes, unless some one mindful of the great charity work in which we are engaged would choose to donate funds to assist in carrying out the improvement outlined.

To meet the expressed view of the Administration it was resolved that the report of Dr. Bel be referred to a special committee composed of the House and Medical Committees of the Board, with Dr. J. A. Danna, the House Sur-

geon of the Hospital, as an advisory connection, with instruction to study carefully the report of Dr. Bel, ascertain the cost of the improvements suggested, and report back to your honorable body, with the object in view that the Board would have before it at all times a perfect and comprehensive reference as to the wants of the institution as a whole, and by this means to make public our wants and deficiencies in the hope that a philanthropic citizenship would be correctly informed as to our deficiencies, and further to enable the Board to approach our wants step by step, with a plan of the whole before us.

REPORT.*

The improvements suggested by Dr. Bel are:

FIRST. Better means for cleaning patients when admitted to the Hospital and to keep them clean thereafter.

SECOND. An increase in orderlies and attendants.

THIRD. Carpenter shop.

FOURTH. Removing of all clothes worn by patients upon admission, the disinfection of same, and the furnishing of the Hospital clothes during their stay.

FIFTH. A sterilizer for sterilizing wearing apparel, bed clothing, mattresses and clothes.

SIXTH. A sterilizer in dressing-rooms for the purpose of sterilizing all dishes, pitchers, cups, jars, etc.

SEVENTH. A thorough flushing daily of all dressing-rooms, wall and floors through a center outlet into sewer.

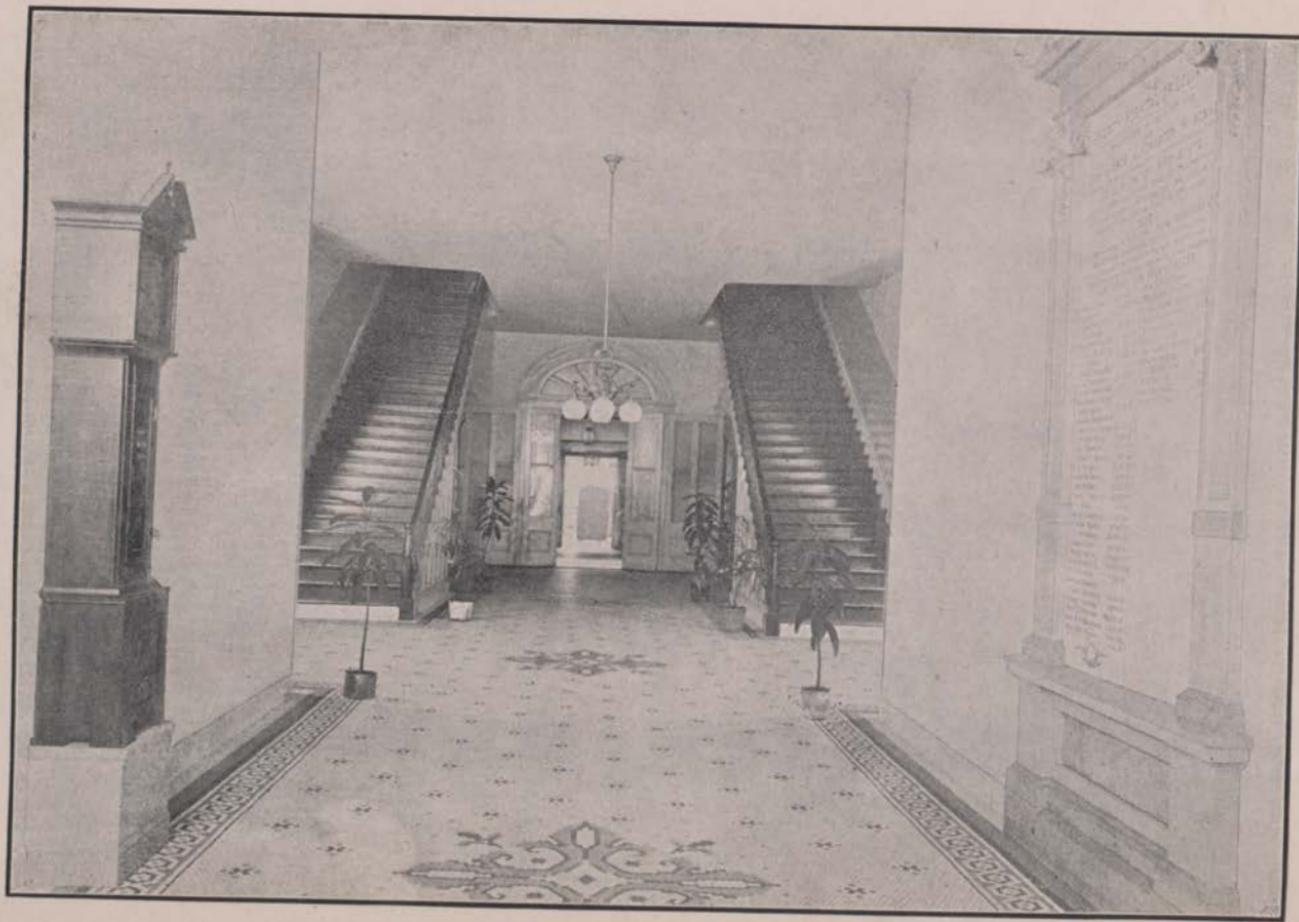

EIGHTH. An Isolation Building for highly contagious and infectious diseases, scarlet fever, measles, diphtheria, etc.

NINTH. A sterilizer in medical service for sterilization of bedpans, urinals, etc.

TENTH. A Detention Building for housing and separating cases under suspicion, or until a positive diagnosis be made.

ELEVENTH. Automobile ambulance.

TWELFTH. Quarters for the help, male and female, employed in the institution.

THE NEWLY-TILED AND RENOVATED MAIN ENTRANCE.

THIRTEENTH. Additional Hospital ward service to relieve the over-congested present conditions by additional story to main building.

FOURTEENTH. Vacuum cleaning system throughout the Hospital buildings.

FIFTEENTH. Garbage, waste and Pathological Department's accumulation destroyed by incineration process.

SIXTEENTH. Refrigerating plant for the storage of dead bodies, to avoid putrefaction and decomposition pending burial.

SEVENTEENTH. Exercising rooms, with necessary apparatus for restoration of function to limb and organ.

EIGHTEENTH. Hydro-therapeutic Department and X-Ray Department properly equipped.

NINETEENTH. New quarters for Sisters, and the use of present quarters for Hospital service.

Before attempting to dwell upon the improvements suggested or their importance and advisability, the fact forcibly manifests itself that considerable improvements must be calculated for before the improvements could in any manner be considered.

FIRST. To arrange for better means of cleaning patients; to arrange for flushing all surgical dressing-rooms, walls, etc., through a central outlet means an entire renovation of the plumbing of the Hospital. The present service is approximately fifty years old, ancient and antiquated, and by far insufficient as to facility for bathing, closets, urinals, etc. This improvement also means the building of two surgical dressing-rooms upon each floor of the Hospital Building, with tiled floors and walls, the present surgical dressing-rooms having wooden floors and cement walls, making flushing as desired entirely impracticable.

SECOND. Removing of clothes, disinfection and cleaning of same, and the furnishing of Hospital linen to bed patients, mean additional laundry service. Our necessities in this connection have manifested themselves for five years back as entirely insufficient, requiring a new and modern laundry calculated to care for all of the laundry of the Hospital.

THIRD. New quarters for Sisters, and utilizing their present quarters for Hospital wards. In the consideration of this matter should be considered the increased number of beds proposed by other improvements suggested, the increased number of attendants and orderlies, and, as a consequence, the increased demand upon our domestic possibilities, referring particularly to kitchen and general sustenance departments, for the reason that both requirements will be met by the building of an Administration Building, furnishing dormitories, library, living-rooms, bathrooms, and chapel for Sisters; also, dining-rooms for Student Staff, help and improved kitchen facilities, and rooms for stores.

It would not be amiss to add right here that we are at all times considering and improving the conditions and environments of the patient, and, perhaps, overlook the comfort and convenience of those who attend them, referring particularly to the Trained Head Nurses and Managers of the internal, domestic and medical affairs (from a trained nurse's standpoint) of the Hospital, the good Sisters of Charity. During ten continuous years of active service for the Charity Hospital the reader is impressed with the good fortune of the State of Louisiana and of the Administration in being able to retain the services of these good women under the circumstances. There are but a limited number of Sisters in the United States engaged in the sacrifice of time and labor to charity, and by far an insufficient number to meet the call made for them from sources such as ours needing their services. I am reliably informed that the good Mother Superior has been compelled to decline requests for service from as many as ten charitable institutions because of lack of Sisters to send. All such requests carry with them, perhaps, satisfactory promises as to home accommodations superior to that we are at present furnishing our good Sisters, and yet the Mother, in the face of these conditions, prefers to take care of such institutions already provided for, and were it possible to send additional Head Nurses to them, rather than accept new responsibilities until the number of Sisters increase so as to permit her so to do. For that reason, and our thorough appreciation

of the fact that the sixty-odd Sisters of the Charity Hospital render services worth, approximately, by comparison with what we actually pay for Head Nurses, fifteen thousand dollars a year, and have done so for seventy-eight years past, thus saving the State over one-half million dollars; and, above the value of dollars and cents, their heartfelt and sincere sympathy, their great executive responsibility, the motherly care and guidance of the eighty-odd young women under them, for years and years, without a single, solitary breath of scandal or undignified behavior, should at least command at our hands that suitable and comfortable quarters be assigned them that their stay in our institution, with its hardships and discomforts as a consequence of their daily contact with people of diseased bodies, minds and morals, be made as pleasant, agreeable and as comfortable as it is in our power to do.

The Administration Building would do much towards improving these conditions, and should be given prompt and serious attention at your hands and at the hands of the rich citizenship of Louisiana.

The various Hospital buildings, the Milliken, Delgado, office and main building, should be connected by glass-covered ornamental-iron open sheds to protect the doctors, Sisters, nurses, help and patients who are now compelled, in rain or other inclement weather, to expose themselves in going to and fro from one of these buildings to the other.

Again, the improvement of the conditions as to the morgue necessitates the erection of an ice plant and the purchase of an electric generator. This investment will, however, meet the requirements as to the morgue, and will at the same time enable us to furnish direct current to the X-Ray rooms, and give us additional lights on the ground, and manufacture our own ice. During the year 1910 we purchased \$2,419.85 of ice.

Auto-Ambulance.—Realizing the great advantage in bringing patients in emergency cases to the Hospital as promptly as possible, the service of our automobile ambulance having been demonstrated beyond question that it was both a practical and economical acquisition, and, to the

credit of the donor, has been the direct means of saving lives, we point out that the Hospital, to meet the demands of this department, requires another such automobile ambulance, as it happens daily that the automobile ambulance is out on a call when phone messages are received for another call.

Apart from the suggestion of Dr. Bel as to an additional story to the main building, Dr. Danna makes a most valuable suggestion that the Colored Female Building be extended to take in the side gallery fronting Robertson Street, and about ten feet additional. This improvement will give us sixty-nine additional beds.

Main Building.—The addition of another story to the main building is not only practicable, but the most economical measure we could employ to increase the bed capacity of the Hospital. For your information this building is, perhaps, one of the most securely constructed buildings in the city. Every division wall in the building is two and one-half bricks thick and extends without a break from the ground through to the roof, making it possible, by tiling all hall floors and boarding over cement walls and floors, to make this building fireproof.

This addition, besides giving us increased ward service by having a flat roof, would give the Hospital a much-needed open roof garden for the open-air treatment referred to by Dr. Bel. It will likewise prove interesting to you to learn that, in view of the present weight of the immense roof, the slate and joists at present employed, the addition of another story and flat-roof covering will lighten the weight on the walls fully ten per cent. and strengthen the entire structure. When you consider that the expense of operating the Delgado Hospital is approximately twelve thousand dollars a year for a bed capacity of 121 beds, and this improvement will give us 165 beds, besides the sun gallery, and will only cost the hospital less than six thousand dollars a year, you reach the reasons of our views as to it being an economical investment. Besides, consider the cost of the Delgado Memorial, in view of its specific use, amphitheatre, etc., a cost of \$168,000, covering 121 beds, whil-

this improvement, with beds, cost but \$45,000 complete in every respect and furnished.

Carpenter Shop.—The Hospital employs from two to four painters all during the year, and two carpenters, renovating and repairing all Hospital buildings and furniture, and making coffins, lockers, tables and general cabinet work, and glazing, etc. We recommend, in view of the room afforded by discontinuance of stalls formerly used by horses, that the carpenters' quarters be enlarged, and that we purchase an electric motor for the making of coffins, instead of hand as now employed, which will save time, labor and expense.

Combining the suggestions of Dr. Geo. S. Bel and the additional suggestions made by your Committee, the following is arranged in the order that the improvements can be approached with a thorough knowledge of succeeding improvements. We list separately the specific buildings, as many of the improvements suggested cannot be thought of until our hopes, as far as these buildings are concerned, are realized. To illustrate: We cannot avail ourselves of the ward service in the building now occupied as a kitchen, dining-room and Sisters' quarters until the Administration Building is erected. Nor can we meet the views of Dr. Bel in the matter of the cleansing of the clothes of patients until a new laundry building, modern and with heavier capacity, is erected and equipped with a sterilization plant; nor can we segregate the contagious and infectious cases with more safety and care than presently employed until we have the Isolation Building, and so on, nor can you increase your orderlies and attendants and get better service thereby until you can give such employees a suitable place to live in.

Land.—The Hospital now owns without incumbrance a plot of ground on Gravier Street next to the Engineer's Department, approximately 22,500 square feet, or one-half square of ground, more than ample to erect the laundry building. The open ground next adjoining the Hutchinson Memorial is easily 200x200 square feet, which is the fixed location of the Administration Building.

The present laundry building and engine shop in the rear of the present Sisters' building is the ideal location for the Isolation Building, from which it is apparent we have the ground vacant upon which to erect the additional buildings required.

First. Laundry building and equipment sewing-rooms, linen storage, repair and general domestic affairs	\$78,000
Second. Administration building, Sisters' dormitories, chapel, bath, storage, etc.....	160,000
Third. Isolation building	50,000
Fourth. Kitchen building, dining-room, students' staff, etc.	70,000
	<hr/>
	\$358,000

IMPROVEMENTS SUGGESTED AND IN ORDER PROPOSED.

	Cost.
1. An incineration plant	\$8,275

14.	Additional story to Female Clinic for housing female employees	7,500
15.	Sterilization room and equipment each floor, pans, urinals, etc., ten floors.....	2,500
16.	Main sterilization department or building for sterilizing clothes, etc., previous to laundering, mattresses and general sterilization....	5,000
17.	Vacuum cleaning process, each Hospital building, four buildings, \$1,000 each building...	4,000
18.	Open-air exercises and room for indoor exercise, massage and osteopathic treatment....	2,500
19.	Glass-covered, ornamental-iron post open sheds, connecting all Hospital buildings....	4,000
		<hr/>
	Total	\$178,525
Building	328,000
		<hr/>
	Grand total	\$506,525

These figures are the result of careful study of your House Committee and Chief Engineer Ponder, and in most instances plans are on file and the estimates furnished by prominent architects.

CONCLUSION.

As a natural consequence, in the consideration of all of the foregoing the cost of maintenance and sustenance of increased attendants, nurses and patients should be seriously considered as increasing commensurately with the gradual increase of our facility for caring for them, as precedent has firmly established the fact that, as fast as we increase our bed capacity by additional Hospital service, just so hurriedly are the beds occupied by the sick, and increased demand made upon our exchequer for sustenance and for additional nurses and help.

With the completion of the Delgado Memorial Hospital, donated to the State through the beneficence of Mr. Isaac

Delgado, which cost \$200,000, you accepted an increased expense along these lines of approximately \$12,000 per year.

While the increase in this expense will be gradual, it is safe to say that, if we were in position to carry out the views herein expressed, it would cost the State approximately just twice as much as we are now paying for help, sustenance and maintenance.

Along this line of thought the true value of buildings, furniture and equipment, by careful appraisement, amounts to \$1,593,933.13, and our annual total cost of operation for 1910 amounts to \$204,707.80, of which amount \$20,000 was spent for permanent improvement, making the net cost of operation \$184,707.80, so that we give treatment to an average daily attendance of 870 sick people, furnish them with the best of medical and surgical attention, with a corps of over 125 Sisters and nurses, provide for help, sustain the sick while in the Hospital, give the general public a free Pasteur Department, furnish gratis all medicine, charge for nothing, not one penny; give approximately 140,000 clinical visit treatments to white and colored, male and female; operate an emergency ambulance service, maintain a corps of graduate students, operate a thorough engineering plant, operate our own laundry, maintain a home for seventy-odd nurses, furnishing hot and cold sterilized water to thirteen buildings over five squares of ground, all for an approximate cost, independent of clinical service, of 58 cents per day per patient, entitling us, and the executive department under us, to all praise for a careful and conservative management.

It is but fair to assume that the State of Louisiana, in view of the most satisfactory indorsements of its Traveling Auditor, the Hon. A. M. Smith, as to our careful and economic management, realizing that we repair, paint and care for its property, attend to the wants of its indigent sick, at a cost of less than 11 per cent. per annum, or 1 per cent. per month, of the Hospital's appraised valuation of buildings and equipment, which is \$1,593,933.13, against our actual annual expense of \$184,707, that they would increase our appropriation at least to enable us to care for the increased number that come to us.

If it were possible to reach our ambitions and make the improvements suggested our institution would then compare with the best-equipped pay sanitarium of the country. Believing that no expense, economically used, would be too great to attend the comfort of the unfortunate indigent sick, while we feel that our institution, beyond some few improvements imperative and necessary can compare favorably with any similar institution in the country, we add our earnest hope that in some way our financial affairs may be so enhanced as to enable us to make all the improvements suggested.

LOUIS ED. VALLOFT,
Chairman House Committee.

J. A. DANNA, M. D.,
House Surgeon.

GEO. S. BEL.
Chairman Medical Committee.

Annual Report of the Finance Committee of the Charity Hospital of Louisiana.

NEW ORLEANS, February 1, 1911.

To the Vice-President and Board of Administrators:

GENTLEMEN—Your Finance Committee respectfully report that the accompanying statements, prepared by the Treasurer, have been duly examined and found correct. These statements give a history in detail of all the receipts and disbursements during the year 1910. They show total revenues of \$200,439.93 for 1910, as against \$204,707.80 of expenditures, showing a deficit of \$4,267.87 for 1910. In other words, the annual statement of the Charity Hospital's expenses shows an increase over the receipts for the year by an amount of \$4,267.87.

During the year it was necessary to make a loan of \$36,500 from the Special Fund, of which \$19,413.74 was used for improvements made during the year 1910, leaving the General Fund owing the Special Fund a balance for 1911 of \$16,586.26.

The cash statement shows on January 1, 1911, a balance of \$23,257.60 as cash on hand, and bonds amounting to \$8,216.25 for the Delgado Memorial Hospital.

The items of disbursements, as per comparative statement of receipts and disbursements for the years 1909 and 1910, show an increase of \$18,870.79, less a decrease of \$17,211.42, making a net increase of \$1,659.37 for the year 1910.

The principal increases in disbursements are: Milk, \$450.58; ice, \$278.85; groceries, \$1,932.54; house-furnishing and dry-goods, \$4,573.46; marketing, \$1,027.32; general and contingent expenses, \$2,919.21.

The following items of receipts show increases during the past year: Hospital appropriations, \$10,000 (see appendix); discount, \$287.68; interest, \$311.77; gate fees, \$642.60; pasteur treatment (from citizens of other States), \$250; interest on Special Fund, \$1,563.22.

The statement of the Special Fund shows a balance of \$17,411.95 to its credit, lending to Special Fund \$19,413.74, and to general fund \$16,586.26. The Treasurer has made a full statement of improvements made during the year 1910, showing in detail all improvements that have been made during the year. The donations during the year show amount received, \$1,821. During the year, however, the Hospital has been compelled to return to the heirs of Albert Derigny, as a compromise made with Mr. Harry H. Hall, on the advice of Attorneys Farrar, Jonas, Goldsborough & Goldberg, the sum of \$878.94. Up to this writing, while the late Mrs. Richardson donated the sum of \$5,000 to the Charity Hospital, the said amount has not yet been received, but we hope to be placed in possession of same in the near future. We especially invite your attention to the appendix attached to the comparative statement, which has been prepared by the Treasurer, which will give you explanations of several of the accounts of receipts and expenditures, and will clear up some apparent inconsistencies.

The usefulness of the Charity Hospital has been greatly extended in the last year. The number of indoor and outdoor patients has been materially increased, therefore expenses must necessarily multiply, and greater appropriations will be required from the State to meet the same. Some provision should also be made to return the loans made by the Special Fund, as it is a sacred fund, intended for specific purposes.

The Treasurer has prepared, by and with the assistance of Mr. Peter Gallagher, auctioneer and expert appraiser, a tableau showing the valuations of the real estate, buildings and properties owned by the Charity Hospital, amounting to \$1,319,000. He has also obtained inventories of the contents of the said buildings, Drug, Pathological and Engineer's Departments, showing an amount of \$274,933.13.

The total valuation of the Charity Hospital to the State of Louisiana is \$1,593,933.13.

We have prepared forms of our own for our insurance policies, and beg to report that the same have been accepted by the underwriters, and we are carrying an insurance on the Delgado Memorial Hospital of \$115,000; on the Richard Milliken Memorial, \$75,000; on the Josephine Memorial, known as the Home for Trained Nurses, of \$24,500. Our steam boilers are insured for \$20,000, and other properties of the Hospital in an amount of \$17,555.

Respectfully submitted,

HUNTER C. LEAKE,

J. B. SINNOTT,

THOS. DOUGLAS,

Finance Committee.

APPENDIX

ASSETS

The difference in rent, as shown in the comparative statement, between the years 1909 and 1910, is caused from the fact that the lease of the Shipper's Press for an amount of \$3,775.57, extended to 1919, was included in the receipts of 1909.

The State appropriation for 1909 show \$146,250, in which was included an amount of \$11,250 due in 1908, but paid in 1910. As a matter of fact, the increase of 1910 over 1909 is \$10,000, which, if deducted from the \$11,250, shows a difference of \$1,250.

The decrease in licenses for 1910 is caused by the decision of City Attorney Moore in the interpretation of the Gay-Shattuck law, the colored people of New Orleans having ceased to take out further licenses for balls since said interpretation.

The decrease in donations is accounted for by the large legacy of Mrs. Tilton, amounting to \$29,900.

LIABILITIES

The difference in officers' salaries for the year 1910 over 1909 is caused by the difference between the old and the new system of bookkeeping introduced into the Hospital. In 1909 the salaries of Registrar, Attorney, Inspector and Stenographer, amounting to \$275 per month, say \$3,300 for the year, was charged in 1909 to General and Contingent Expense whereas in 1910 the salaries of the above-mentioned officers is included in officers' salaries.

The increase in milk and ice is caused by increase of price over last year. The same with groceries and marketing.

Medical and surgical increase is caused in number of indoor and outdoor patients, and also from the fact that many of the purchases that were made in 1909 by the Pasteur Department were made in 1910 by this department.

Increase in employees' wages in 1909, before the opening of the Delgado Memorial averaged \$2,199.89 per month; whereas, since the opening of the said Delgado Memorial, the monthly average is now \$2,581.02, a monthly increase of \$381.13, and a yearly increase of \$4,573.56.

Donations.

ACKNOWLEDGED BY SISTER MARY AGNES, 1910.

Mrs. D. A. Milliken—New furnishings for Milliken Memorial, Christmas tree, decorations, toys and candy.

Mr. Isaac Delgado—New brass washer and extractor for laundry.

Mr. Charles A. Farwell—Three barrels oranges from Milliken Plantation.

Mr. Harry Farwell—Tobacco and pipes for patients.

T. Hausmann & Sons, Ltd.—Handsome hall clocks.

A. Weiblen Marble Works—Marble pedestal for clock, and two large marble tops for sewing-tables.

Society of St. Vincent de Paul—Distribution of interesting literature every Sunday; also, handsome bookcase, with collection of standard works.

S. Kottwitz Company—Two boxes apples and box cigarettes.

Smith Bros.—One case assorted preserves.

Consumers' Biscuit Company—Large box cakes.

Vories Biscuit Company—Large box cakes.

Singer Sewing Machine Company—Three sewing machines.

Anthony Gardina—Eight bunches bananas.

United Fruit Company—Several wagonloads of bananas.

Rev. Father Vial—Box of oranges.

Mrs. S. Newman—Large box of cakes.

Lee Can—Two caddies of choice tea.

McDonogh Schools 11 and 18—Easter eggs, candy and fruit for children.

Game Commission—Two hundred pairs of ducks and three dozen birds.

A Benefactress (to honor little daughter's birthday)—Treat of cream and cake to all children in the Hospital.

Dr. H. A. Gamble—Bolt (fifty-six yards) toweling, Ward 38.

Mrs. L. E. Cousant—Basket of vegetables and five pounds of candy, Ward 38.

Miss Hannah Bauman—Treat of ice cream for patients in Ward 38.

J. W. McMahon—Ten dollars for Christmas dinner for patients, Ward 13.

Wm. Wishard—Twenty dollars for linoleum, Ward 13.

Mrs. Hussy—Two dozen pillowcases and roll of toweling, Ward 12.

Mrs. M. L. Cohn, Mrs. R. S. Braboy, Mrs. A. Marbrough, Mrs. T. H. McLin, Mrs. J. W. De Sauge, Mrs. Edwin Molyet, Miss Fern Wiggs—Contribution of bed linen and useful articles for Ward 72.

Ladies of St. Margaret's Circle—Several treats of candy for children.

Patients of Ward 46—Bookcase and rug.

Elks' Lodge—Large basket of vegetables and fruit for Ward 58.

Mrs. Coleman—Baby carriage.

Dr. W. W. Butterworth—Five dollars for children at Christmas.

Grateful Patient—Pair of turkeys for Ward 34.

Visiting Staff of Charity Hospital and Other Friends of the Institution—Seven hundred dollars for tiling Main Hall.

Graduating Class, 1910—Five hundred dollars.

Nurses of Training School—Useful articles of clothing for the poor.

Useful articles of linen, glassware and tableware given by employees are all gratefully acknowledged.

Annual Report of the House Surgeon.

NEW ORLEANS, February 20, 1911.

Your Excellency and Members of the Honorable Board of Administrators of the Charity Hospital, New Orleans, La.:

GENTLEMEN—It is my proud privilege to present to you to-night a report of the work of this institution for the year ending December 31, 1910.

On January 1st there were 785 patients within our walls; 11,313 were admitted during the year, making a total of 12,098 inmates for the year. There was a daily average of 870 patients, and 819 remained on January 1, 1911.

Besides this number there were 8,550 cases treated in the accident and emergency service; and 18,916 new patients, who received 98,596 treatments, were treated in the outdoor clinic department; and 1,682 were treated by the Ambulance Corps at their homes, or at the site where they were hurt or taken sick; so that we cared in all for not less than 40,000 people, a number sufficient to populate a good-sized city.

Of the total of 12,098 inmates, 9,700 were discharged cured, improved or unimproved, and 1,579 died, giving us a gross death rate of thirteen per cent. Five hundred and six of these were more or less moribund when brought in, dying within a few hours after admission. The net rate, after deducting these, was 8.8 per cent. Again, 880, or 55.73 per cent. of the deaths, were the result of such incurable conditions as tuberculosis, to the number of 265; organic heart disease, 155; Bright's disease, 224; and accidents, poisons and violence, 236. There were 224 Coroner's cases.

In the A. B. Miles Surgical Amphitheatre there were 8,550 accident and emergency cases given immediate attention, and 2,798 operations were performed. In the Delgado Memorial Operating Rooms 1,319 operations were performed, making a total of 4,117 operations in all. Ether anæsthesia was induced 2,228 times; chloroform, 111 times; other forms of general anæsthesia, 64 times; spinal analgesia, 233 times, and local anæsthesia, 281 times.

The addition of the Delgado Memorial Operating Rooms to our previous facilities has been a great aid, and rendered it possible to do nearly double the amount of surgery done before. We now use these rooms not only for the patients of the Delgado Memorial, but for those of the Milliken Memorial as well, obviating the necessity of carrying the children two or three hundred yards to and from the Main Amphitheatre.

The Ambulance Corps was prompt in responding to 1,682 calls, made in an average time of twenty-three minutes. This service has been very materially improved by the use, since April 28th, of the new automobile ambulance, the gift of an unknown donor. We have thereby been enabled to reduce the average time of making a call from twenty-eight, to twenty and nineteen minutes.

In the Obstetrical Service, 365 women were delivered and 367 children were born, there being two cases of twins. There were five deaths in this department, only one being due to septicemia, in the case of a colored woman brought in from the outside in labor.

The Pathological Department has been most ably conducted by Dr. O. L. Pothier, the pathologist, with the help of Dr. M. J. Couret, his assistant. Many improvements have been made in this department. There were 17,773 specimens examined, an increase of more than 2,000 over the previous year.

The Pasteur Department, also under the management of the pathologist, has continued to increase in utility; 635 persons bitten by dogs suspected of having hydrophobia having received attention, as against 587 the year before.

The Department of Pharmacy, under the direction of Mr. Jos. P. Walker, our chemist, has kept pace with the work of the Hospital, and has been ably and economically conducted.

The Registration Bureau, under the able supervision of Dr. G. Farrar Patton, has grown in importance and usefulness, its files being more frequently consulted than ever before. Eleven thousand four hundred and ten clinical histories were filed during the year, of which 4,557 were medical, 4,258 surgical, 907 gynecological and 960 obstetrical.

In the Department of Electro-therapeutics, in charge of Dr. Amedee Granger, there has been a larger number of radiographs and fluoroscopic examinations than during any previous year.

The pupils of the Training School for Nurses have been faithful workers and diligent pupils. A high standard of efficiency has been maintained, and thirty-three graduates were awarded diplomas on December 10th.

Our Resident Student Corps have labored arduously in their respective services.

The members of the Visiting Staff have given their valuable services with the same untiring devotion and kind interest in their work.

Many necessary improvements have been made during the year, to wit:

A glass shed has been erected over the side entrance to the main building, protecting ambulance and other patients in inclement weather.

A hot and cold water sterilizer of increased capacity has replaced the old and smaller one in the A. B. Miles Surgical Amphitheatre.

An ordinance has been introduced in the City Council, providing for the paving of Villere Street, from the Hospital to Canal Street, and the other streets surrounding the Hospital.

The floor of the entrance and Main Hall of the Main Building have been tiled and the walls painted, the old

unsightly elevator removed, and the old radiators replaced by new open ones, and the memorial tablet placed in the main entrance, completely transforming the entire view, giving the visitor as he enters the front door a much more cheerful and inspiring sight.

A new electric elevator has been installed in the Main Building.

An electric elevator has been installed in the White Women's Building.

A dumb-waiter has been installed at each end of the Main Building, and one in the Colored Women's Building.

The colored surgical wards have been removed from the first to the third floor of the Main Building, the old elevator space on the third floor converted into a spacious dressing-room, and that on the second floor into a small dormitory for the male help.

In the Laundry there have been installed one new washer, one new mangle, and two new drying-rooms, and Mr. Delgado has donated one extractor.

The Kitchen has been enlarged, and improved dining facilities afforded the male and female help.

These improvements have helped to facilitate the work of the house and increased the comfort of our patients and employees.

But there are many other things needed, and for which provision must be made, if we are to continue to maintain our good name. I will leave to a committee, especially appointed for that purpose, the naming of all these things that we need and ought to have, but beg that you consider particularly the proposal to add another story to the Main Building, and an addition to the Colored Women's Building, both of which improvements will, at a cost of not more than \$50,000, give us an additional 230 beds, and very materially relieve the present congestion in the Hospital, of which you may get some idea from the fact that, though we had but 976 beds actually in service in the various wards, we had on the 9th instant 1,004 patients. It is evident that a great number must have slept on the floor, or two in a bed.

Here let me pause a moment to call your attention to the phenomenal increase in the work of the Hospital last year, as compared with the previous year, which was the largest in our history up to that time. There has been an increase in the work of every department, without exception, as a glance at the following comparative list will show:

COMPARATIVE STATISTICS.

	1909.	1910.
Remaining at beginning of year.....	782	785
Number admitted	9,576	11,313
Total number treated	10,358	12,098
Daily average remaining.....	797	870
Remaining at end of year.....	785	819
Number discharged	8,263	9,700
Number died	1,310	1,579
Gross death rate.....	12.6%	13%
Number dying within thirty-six hours of admission	433	506
Net death rate.....	8½%	8.8%
Coroner's cases	193	224
Number of operations.....	3,208	4,117
Ambulance calls	1,510	1,682
Accident cases	7,922	8,550
Births in Hospital.....	326	365
Outdoor clinics, new patients.....	17,443	18,916
Outdoor clinics, consultations.....	74,585	98,596
Pathological specimens examined.....	15,763	17,773
Number treated in Pasteur Institute.....	587	635
Total number treated in all departments, over	36,000	40,000
Histories filed by Registrar.....	9,735	11,410

Even the increase in the gross death rate from 12.6 to 13 per cent. is significant, for it is the result of having had to refuse admission to a great many patients in those departments that are most crowded, which means that only

the more seriously sick were admitted and treated, and the mortality among them was necessarily higher.

Another significant item is shown in the following partial list of the purchases by the Department of Pharmacy, which includes the more commonly used pharmaceuticals, the average increase being 50 per cent., and in some instances over 200 per cent.

Purchases of some of the more generally used drugs:

Drugs, etc.	Amount purchased, 1909.	Amount purchased, 1910.
Urotropin tablets	30,000	100,000
Green soap, barrels.....	8	12
Peroxide, barrels	8	12
Epsom Salts, barrels.....	6	9
Potass, Iodide, pounds.....	150	200
Potass, Bromide, pounds.....	100	150
Glycerine, pounds	500	1,100
Ether (common), pounds.....	300	600
Bichloride, pounds	25	50
Carbolic acid, pounds.....	500	1,000
Adhesive plaster, rolls.....	800	1,200

All this means that not only have we treated a large number of patients, but we have done more for them than in previous years; for with the advances in modern methods of diagnosis, and our increasing knowledge of the causes and nature of many diseases that a few years ago were unknown or unrecognized, there have been instituted more active and thorough methods of treatment, requiring not only medicines, and instruments and apparatus, but a trained professional body of increasing size. Some idea of this increase may be gained from the fact that the official reports show that there were ten physicians on our Visiting Staff in the year 1880, thirty in 1890, eighty in 1900, and 130 in 1910.

Yet with all the increased cost of treating each patient due to causes just stated and the increase in the cost of

living, and particularly of the necessities of life, we are running this institution at an average gross cost of 58 cents a day per patient, which is about one-fourth what it costs in the majority of institutions of a like character in the United States.

It is to the economy and untiring work of our Sisters of Charity that we owe the possibility of accomplishing what we do with so little money. For not only do they themselves work without compensation, except food and clothing, but they thereby set an example to the more able-bodied and the convalescent among the patients, who willingly do a large part of the domestic work and help in the nursing according to their ability.

Mr. John Ponder, our Engineer; Mr. Jas. R. Leake, our Clerk, and Captain L. P. Delahoussaye, our Secretary, have been ever kind and courteous in the conduct of their departments.

Our good, noble band of Sisters of Charity, under the guidance of Sister Mary Agnes,—whom, though she has been with us but a short time, we have learned to love and revere,—have worked faithfully in their humble, unassuming way, toiling unceasingly in their labor of love, spreading sunshine and good cheer among the sick, standing as a living example and insuring the moral integrity of our institution.

In conclusion I desire to express my appreciation of the valuable assistance and earnest co-operation of my assistants, Dr. W. S. W. Stafford and Dr. C. G. Cole, and my heartfelt thanks to your Honorable Body for your unceasing kindness and the encouragement of all my efforts.

Respectfully submitted,

J. A. DANNA, M. D.,

House Surgeon.

NEW ORLEANS, April 28, 1910.

Hon. L. E. Valloft, Chairman House Committee, New Orleans, La.:

DEAR SIR—I take pleasure in hereby notifying you that the Abbott Automobile Company delivered to the Hospital this afternoon the magnificent new automobile ambulance donated by a generous unknown philanthropist, through Dr. E. A. Edbrooke.

Two of our drivers have been thoroughly instructed in running and handling the machine, and have had more than two weeks' practice with it, so that they are perfectly competent to take care of it.

It was owing to the desire to thoroughly train our drivers and to give them this experience that the formal acceptance of it was postponed to this day.

It is indeed a beautiful piece of work and has excited the admiration and praise of all who have seen it, until it is now the subject of talk throughout the city.

It is up-to-date in every respect, and is equipped with all the latest appliances that go to make up a perfect ambulance. It can accommodate six patients at a time and will therefore be able, in case of a catastrophe where many people are hurt, to carry three times as many patients as our horse ambulances. Besides, it can travel much faster, and for an indefinite period, and for the longest distance with the same ease as for short distances. It will therefore be the means of saving many lives, as, for instance, in cases of heat prostration, asphyxia, poisoning, and many other conditions where it is necessary to reach the patient as quickly as possible with medical assistance, or get him quickly to the Hospital for special treatment. For, while the horses may be galloped at full speed for short runs, they cannot go very fast for long runs, such as to Carrollton or the Barracks.

Taking all these things into consideration, I feel that the kind donor deserves the thanks and appreciation of all those who have the welfare of the poor and the relief of suffering humanity—rich or poor—at heart. For no gift was

ever made for a more worthy purpose, nor was ever money put to better use.

Let us congratulate ourselves and the people of this city and State on the possession of such a valuable necessary adjunct to our Hospital, and let us hope that the example of this good-hearted citizen, whose modesty has caused his name to be kept from the public, may be emulated by others who may be well blessed with the goods of this world, to the end that we may be soon able to procure a new Laundry, Isolation Hospital, Dormitory, new buildings for patients, and many other things which we need so badly, but which we must do without for lack of funds.

With best wishes,

Sincerely yours,

(Signed) Jos. A. DANNA, M. D.,
House Surgeon.

EXTRACT FROM "THE DAILY PICAYUNE," JAN. 1, 1910.

In contemplating in retrospect the work of the year 1910 we find cause for congratulation in the fact that we did the largest year's work in the history of our institution.

We had a larger daily average number of patients within our walls, we treated a larger number of out-door patients, and had a larger number of accident cases treated in our Amphitheatre and by our Ambulance service than ever before.

Yet our death rate has been comparatively lower, despite the fact that though we were extremely crowded last year no additional accommodations have been provided to keep pace with the increased number to be taken care of.

The volume and character of our work is hardly appreciated by the general public. During the past year more

A GROUP OF MILLIKEN MEMORIAL PATIENTS.

than ten thousand* people slept within our wards. Ours is the broadest charity in the land, for no matter what a man's nationality, or race, or social or physical condition may be, all that we ask is that he be in need of medical attention and he is admitted as a patient. What would the poor of our city and state and adjoining states, and even distant states and countries, do, who land in our midst and have not the means to pay for a physician, were it not for the open gates of the Charity Hospital? And here they get not only better attention than they could possibly have in their own homes, but in some respects better than any money could buy anywhere.

Our Ambulance and accident service and our Pasteur Institute are patronized by the richest in the land, as well as the poorest, because there is nothing better of its kind to be had for money.

But have we all the facilities that we should have? Not by a great deal. True we do wonders with what we have. We run our Hospital on one-third or one-fourth what it costs to run other institutions doing an equal amount of work of a like character, due mainly to the economy practiced under the able management of our Sisters of Charity, and the fact that they themselves work for no compensation, save for the clothing that they wear.

But there are many things considered essential in a general hospital that we must do without because of lack of funds.

We should have at least another auto-ambulance. The new one donated during the year by an unknown donor has done excellent work and reduced the average time of each call from thirty to eighteen minutes, which included calls made by the horse ambulance.

We need additional buildings for more wards for patients who are now forced to sleep on mattresses on the floor, or two in a bed.

We need dormitories for the male and female help, the majority of them having to sleep in wards with sick people.

We need a modern laundry, much of the washing being done by hand. We need an ice plant and an electric plant.

We are the only institution in the city that treats infectious diseases, yet we have not a building in which to isolate them, but must put them in buildings with other patients. We should have a special building to take care of our tuberculosis cases.

All these and many other lesser things are pressing needs, and though we are thankful that we have been able to accomplish so much in the past with our present facilities and the last General Assembly, owing mainly to the interest of Governor Sanders in our behalf, was as generous as state finances would permit, I desire to voice the New Year's wish that some body or bodies unusually well blessed with worldly possessions, some Rockefeller or Carnegie, or some other Mrs. Milliken or Mr. Delgado, may chance to appreciate the character and volume of our work, see our wants and provide substantially for them.

*12,098.

J. A. DANNA, M. D.,
House Surgeon.

Pathological Department.

CHARITY HOSPITAL.

STATE OF LOUISIANA.

NEW ORLEANS, LA., February 6, 1911.

To the Board of Administrators of the Charity Hospital:

GENTLEMEN—I have the honor to submit the following annual reports of the Pathological Department and Pasteur Institute for the year ending December 31, 1910:

Specimens of urine examined	12,888
Specimens of blood examined	2,017
Specimens of sputum examined	1,359
Specimens of feces examined	538
Specimens of cultures examined	179
Specimens of pus examined	74
Specimens of stomach contents examined	37
Specimens of smears examined	48
Specimens of fluid examined	38
Specimens of gastric contents examined	6
Specimens of pleural eff. examined	3
Specimens of discharge examined	6
Specimens of secretion examined	3
Specimens of exudate examined	1
Specimens of tissue examined	187
Autopsies held	218
Photos taken	87
Wasserman reactions	69
Specimens preserved	15

In the Pasteur Institute there were 635 applicants; 377 cases were dismissed without treatment, 258 cases were treated, 249 cases discharged, 19 cases deserted, and 18 cases are left over to January, 1911, to complete their treatment.

The residence of the patients was as follows:

Louisiana	509
Mississippi	106
Alabama	6
Tennessee	3
Arkansas	10
Georgia	1
	—
	635

Thirteen animals' brains were examined during the year.

IMPROVEMENTS—During the year we purchased three microscopes for the department, and had three old microscopes repaired, which give the department seven microscopes in commission. We purchased, also, during the year one large hot-air sterilizer, one large steam sterilizer, and two special water baths for evaporating alcoholic solution. One electric fan for evaporating was also purchased.

Before concluding I wish to commend the work done by different students assigned to my department during the year, and also to my Assistant Pathologist, Dr. M. Couret. I also wish to thank the House Surgeon, Dr. J. A. Danna, for facilities given during the year for the better working of the department.

Respectfully,

O. L. POTIER, M. D.,

Pathologist.

Annual Report of the Medical Committee.

NEW ORLEANS, LA., February 20, 1911.

To the Board of Administrators, Charity Hospital of Louisiana, New Orleans, La.:

GENTLEMEN—To determine the success of any hospital one must know something of its work, its patients, its surroundings and its ideals. Then the true measure of its achievements is found by comparing the work of the current year with that of the preceding years.

For the details of the year's work we refer to the able reports of our esteemed Vice-President, Dr. E. S. Lewis, and House Surgeon, Dr. J. A. Danna, to whose painstaking labor we owe the commendable manner in which the subject is placed before the public.

In reviewing the work done in the various departments of the Charity Hospital for the year 1910, one cannot be otherwise than surprised at the amount that has been accomplished and the extent to which suffering has been relieved.

The armamentarium of a hospital is one of its most important adjuncts. It is here that a word in conclusion, however, of the medical co-workers, Sisters and nurses of our Hospital will not be amiss.

The House and Visiting Staffs represent the highest professional skill obtainable in the South, co-operating with the management in ministering to the needs of the patients at the Hospital.

It is our privilege to express the appreciation of the management of the marked devotion of the members of the House and Visiting Staffs to the interest of the Institution. These gentlemen give their time and attention to the needs

of the sick and suffering with such tender solicitude as to greatly lessen the sense of discomfort and brighten the lives of those to whom they minister.

We cannot too highly praise the sympathetic care and skillful attention of the disciplined corps of Sisters of Charity, which has done so much to soothe and alleviate the suffering and distress of the inmates of the Institution. Upwards of forty members of this order devote their lives to the work without salary. Many of the Sisters are trained nurses, and in this capacity they excel. Every head nurse is a Sister of Charity, and brings to the department of which she is the head the valuable counsel and conservative guidance that result from large experience and wide research.

This feature of experienced and continuous supervision by a Sister who is a trained nurse is one of the most potent factors in keeping the Institution in the front rank of hospitals. It is most reassuring to the sick to know that the nurse is personally directed by a Sister, who sees that the patient's every need is promptly supplied.

The Internes deserve special commendation for their generous and efficient labors. The agreeable manner in which they at all times comport themselves is truly appreciated and elicits our sincere interest in their present and future welfare.

No department in our Institution is worthier of praise than the Training School.

The corps of pupil nurses continues to do credit to the Institution, and prove an interest in the welfare of the Hospital which is, indeed, gratifying.

The high appreciation of service rendered by our graduate nurses is shown by the constant demands made by patients and physicians for their services.

At a former meeting of the Board we were requested to submit a report upon the needs of our Hospital.

In compliance with that request we beg to make the following report:

We wish to preface this, however, by the following remarks—that the present advancement of our Institution

is worthy of favorable comment and reflects very creditably upon its officials in the face of the many obstacles, particularly insufficient finances, which they have been forced to surmount.

However, even at present, some few necessary improvements are compatible with our means at hand. Again, other portions of our report can only be practical when further funds are obtained, and these changes, we feel, are of such vital importance that the provision for carrying them out must be made in some manner by us, the members of the Board of Administrators.

NEEDS OF THE HOSPITAL.

Better means are needed for cleaning patients when they are admitted into the Hospital and keeping them clean thereafter.

For this purpose a considerable increase in the bathing facilities of the Institution is needed.

Further, such improvement calls for a number of male orderlies and female servants, who should be able-bodied, properly housed, fed, clothed and paid.

The clothing of all patients, no matter how shabby or worn, should be removed on admission and subject to disinfection before being returned to them during their stay or discharge from the Institution.

A large sterilizer for the Hospital is very much needed for the following purposes:

Wearing apparel, bed clothing, mattresses, everything in contact with the sick, should be placed in the large sterilizer and submitted to the action of steam until thoroughly cleansed. All the disease germs are thus annihilated, and the danger of infection, even the least, entirely banished.

In the Dressing-Rooms provision should be made for steam sterilizing all dishes, pitchers, jars, etc., and for cleansing the walls and floors by flushing to a central floor outlet. This is a crying need, especially in the venereal wards.

In the medical service provision should be made for steam sterilizing of dishes, urinals, bed pans, etc., so as to kill all germs and prevent dissemination of poison or disease. This is especially true in typhoid-fever patients and other infectious diseases.

ISOLATION BUILDING.

One of the very important needs of our Hospital is a building, or several buildings, entirely separated from the main buildings, for our highly-contagious and infectious diseases—for example, scarlet fever, measles, diphtheria, erysipelas, etc. In a hospital of this magnitude the danger of the introduction of contagious diseases is always to be dreaded.

When we consider the manner in which the wards of this Hospital open upon each floor, and the difficulty of even isolating one floor from another, we begin to appreciate the danger of the introduction of contagious diseases among our patient population.

To overcome this danger as far as possible we urgently recommend the erection of an isolation building, in which all contagious diseases can be separately treated. A portion of the building could be reserved for the detention of all suspicious cases, which could be observed and cared for until a positive diagnosis could be made, before a transfer to the Hospital proper is ordered, without danger of exposure to themselves or others, as, unfortunately, is existing at the present time.

We are confident that the friends of the Institution will aid the Board of Administrators to make it possible to provide this most valuable adjunct, which would prove of such vital importance to its best interests and to those of its inmates.

Those to whom Providence has generously granted the means and the inclination to help their fellow-men can find here ample opportunity for the widest benefaction.

HELP IN THE HOSPITAL AND QUARTERS FOR SAME.

The care of its employees is a feature which our Hospital, though recognizing to its fullest extent, seems unable, unfortunately, to provide for on account of financial condition.

The quarters assigned to some of our help are overcrowded, unsanitary and unattractive, and they often sleep in the same wards with the sick.

The absence of suitable quarters for employees has contributed in a large measure to the difficulty of securing and retaining a proper grade of help.

Far too little financial inducement is offered to some of our employees. It follows that an inferior class of help is employed, and usually such that find difficulty in obtaining employment elsewhere.

There is, consequently, an everchanging of service, and the result is unsatisfactory to all concerned, the management is constantly annoyed and the supposed economy is the source of much of the complaint that finds its way to the public.

OVERCROWDED WARDS.

Some of the wards, particularly the colored wards, are especially overcrowded, and space originally intended to accommodate twelve to sixteen patients has been forced to hold more—sometimes there being three patients in two beds. Such crowded condition of the Hospital wards is unhygienic, not beneficial to the unfortunate sick, and does not permit the physicians and nurses to do their work to the best advantage.

The addition of another story or floor to the Main Building would be of immense benefit and relieve the situation at once; it would also make possible the open-air and modern treatment of the advanced cases of pulmonary tuberculosis.

It seems likely that one of the causes for overcrowding the Institution will continue and that more and more this

Hospital will become a hospital-home for incurable and chronic individuals and for infirm and senile persons.

VACUUM CLEANING SYSTEM.

The leading hospital authorities agree, where power is available, that every hospital should be provided with a vacuum cleaning plant.

The chief advantage of the vacuum cleaning system is that all dust and dirt are taken directly to the receiver without disturbing or distributing the particles of dust or bacteria which are always a menace where the floor is swept in the ordinary way, as our Hospital is now doing.

GARBAGE CREMATORY.

The disposal of garbage and waste accumulation from the wards forms one of the most serious problems that confront the Hospital. There is but one safe method of disposal, and that is by *cremation*, prompt, swift and sure.

We do not believe you can recommend too strongly the use of such an apparatus for hospital purposes.

REFRIGERATING PLANT FOR THE PRESERVATION OF DEAD BODIES.

This is needed for the following reasons:

Bodies often lie for hours, wrapped merely in a sheet, in the anteroom of the Pathological Department, and in warm weather undergo rapid putrefaction.

The bodies, therefore, should be put in a cooling-room, which prevents decomposition and preserves the bodies for several days, if necessary, and protects them from various insects.

EXERCISING ROOMS are required, properly equipped with the necessary apparatus for the restoration of function to limbs and organs that seriously handicap their unfortunate possessors in the struggle for existence.

HYDROTHERAPEUTIC DEPARTMENT.

It should be fitted with all the appliances necessary for the various forms of bath treatment. Such treatment would be of material benefit to the patient. Massage treatments should also have their place.

An ELECTRO-THERAPEUTICAL ROOM, with a complete equipment for the use of electricity in the diagnosis and treatment of diseases, is also needed.

The X-RAY DEPARTMENT is sadly in need of greater improvements, especially for the medical service—particularly for floroscopic work.

The SISTERS OF THE CHARITY HOSPITAL need no introduction. They do not work for remuneration, nor do they seek for glory or other emolument. Theirs is a task of loving kindness and devotion to the interests of the Hospital and care of the indigent sick.

Their recognized ability and knowledge as trained head nurses, never changing, and as a consequence attaining success and additional scientific professional knowledge as such, render their services incalculable.

We recommend that, their quarters being entirely insufficient, a new home be established for their special abode, and the premises now used by them be utilized for additional hospital purposes.

While the foregoing are, in our opinion, some of imperative, but all of special, importance, we are not unmindful of the enormous amount of finances necessary to bring them about successfully. It occurs to us that the best possible plan would be a consideration of the conditions as set forth, with a view of remedying them, step by step, in accordance with the means at hand; or, in other words, to have before us at all times our wants as a whole, and, while modify or improve one condition, can be in a position to know of the improvement it will have towards the final correction of the whole.

We should be frank about the needs of the Hospital—the more frank we are and the more generally they are

known to the public at large the more careful we will be to keep our institution up to a higher standard.

In conclusion, we hereby recommend that the members of the Board of Administrators of this Charity Hospital accompany the Medical Committee, House Surgeon, and Sister Superior Agnes, to thoroughly and properly inspect the Hospital monthly, at a date and hour to be fixed by the Board, thus seeing the weakness as well as the strength of the Institution.

In this manner we will not be allowed to drift along in ignorance, patting ourselves on the back and believing that we have the best hospital in the country.

Respectfully submitted,

GEO. S. BEL, M. D.,
Chairman.

DELGADO MEMORIAL.

Report of Directress.

NEW ORLEANS, December 10, 1910.

To the Honorable Members of the Charity Hospital Board of Administrators:

GENTLEMEN—With the close of this session, marking the termination of the seventeenth year since the founding of the Charity Hospital Training School, I have the honor of submitting to you the annual report upon the work and progress of this important adjunct of our institution.

Covering this lapse of time, the advances for the interests of the School, fostered and encouraged by your ever-ready and kindly consideration, have been uninterrupted, and its reputation as a medical and educational factor fully recognized, meriting through the excellent character and work of its many graduates public affirmation and appreciation. The realization of this ultimate unanimity of approval can only be attained by unremitting effort on our part to further the development of those essential qualities of heart, mind and head which should characterize the nurse. The selection of candidates for the profession is a criterion upon which the standard of the School may be justly based and the estimate of its excellence formed. The necessity and obligation of realizing these requirements in the candidates are molded by experience, based upon merit, modeled upon public sentiment and approval and the desire of enhancing the glory of Alma Mater. The duty, thus involving the weight of responsibility for a public necessity and for the promotion of a public good, and which duty, in its fulfillment of purpose, reflects favor or defect, is a discerning one and an exacting master.

The worthily-deserved reputation of the School is confirmed by the continued large number of applicants to its classes. These during the present year were two hundred

and eighty. Sixty of these were accepted for the term of probation, thirty-three of whom were retained to continue the course. The decrease is accounted for by the withdrawal of some and the lack of the necessary qualifications in others.

The total enrollment of the School numbers one hundred and four, thirty-three of whom, having successfully stood the test of examination, are to-day eligible for graduation honors.

The session of 1911 will open with a Senior Class of twenty-eight members. The Junior Class, to be completed from the applications on hand, comprises forty-one members.

I take pleasure in presenting to you the Graduating Class of 1910. For their work and character my praise is unhesitating. They bear with them my continued interest in their welfare and my affectionate good wishes for a most successful career.

My associates are untiring in facilitating every opportunity for instruction. The auxiliary branches of teaching have been satisfactory. The invalid-cookery course has been completed, and a series of demonstrations in massage given. Our Faculty of Lecturers have, by their continued interest, aided materially the progress of the School, and merit our appreciation and gratitude.

I take pleasure in giving expression of thanks to our most worthy House Surgeon, Dr. J. A. Danna, and his able assistants, Drs. S. W. Stafford and C. G. Cole, for their unfailing assistance and favor.

In conclusion, accept my appreciation of the generosity manifested and the support afforded me by your Honorable Board. Mine is an unfeigned pleasure of association with you in a labor prolific of good, incalculable in benefit to our sick poor, great and God-like in its spirit, which has rendered peerless and proverbial its broad, unsectarian charity, the magnitude of which is an incentive to universal favor.

Respectfully submitted,

SISTER AGNES, *Directress.*

GRADUATING CLASS 1910.
Charity Hospital Training School for Nurses.

FRANK B. MOORE

Report of Chairman of Faculty.

NEW ORLEANS, December 10, 1910.

To the Honorable Board of Administrators of the Charity Hospital, New Orleans, La.:

GENTLEMEN—It is my proud privilege to-day to crown the work of the seventeenth year of the existence of the Charity Hospital Training School for Nurses by presenting to you the class of 1910. There are to-day 104 pupils in the School, the same number as on the date of last graduation, and the highest number yet reached. The present Junior Class of twenty-eight now becomes the Senior Class, and the new Junior Class will begin the year with forty-one pupils. The health of the individual members has been exceptionally good, and the highest standard of discipline has been maintained throughout the year.

These young ladies are the cream of 219 applicants for the course of training in this institution, of which number sixty-eight were accepted as pupils, and the present class of thirty-three have stood the test of two years of hard work and self-sacrifice, and now stand ready to receive their reward at your hands.

They have toiled in the wards, at the bedside of the sick and suffering, first in a minor capacity, attending to the general comfort of the patient, keeping him clean, the beds neatly made and the ward in order; later learning to take temperature, pulse and respiration, and properly recording them; then trusted to administering diet and medicines; noting the progress of disease, and learning to detect changes in the patient for the better or the worse; training the eye, the ear, the hand, to a degree of high perfection of observation and skill; cultivating a gentle touch, and pouring forth that sympathy and sunshine and good

cheer that make of every true woman a born nurse; rising in the operating-room through the various steps of usefulness, from pouring water from a pitcher to assisting in the most delicate operation—they have developed from the raw recruit of the timid schoolgirl, or the sturdy working-girl, or the spoiled daughter of riches and plenty, into a full-fledged, thoroughly-trained, highly-skilled angel of relief, all under the direct guidance and instruction of those noble soldiers in the war against disease—moral as well as physical—those women who have left all that was dear to them in this world to devote their lives to the work of bettering the condition of the sick, and the poor, and the friendless, the good Sisters of Charity, nearly all holding diplomas from our own School, some from other training-schools, who are the head nurses of the various departments, and one of whom is in charge of every ward and department of the institution.

The present class have been faithful and untiring workers and diligent students, and the results of their examinations have been a source of pardonable pride to the Faculty of Lecturers.

It is with the keenest pleasure, therefore, that I now present to you the following young ladies as worthy of the Hospital diploma and medal:

Miss Victoria Bush, Miss Nellie T. Carmody, Miss Mattie P. Calhoon, Miss Lela B. Coleman, Miss Juanita E. Davidson, Miss Eunice R. Donner, Miss Ida H. Edwards, Miss Josephine Foley, Miss Lottie E. Giffin, Miss Pearl E. Griffin, Miss Alice Guillot, Miss Agnes L. Hobgood, Miss Annette D. Hoffman, Miss Mary A. Hooley, Miss Ida M. Knobloch, Miss Mary E. Koeing, Miss Josephine McGill, Miss Lillian E. McFarland, Miss Blanche McMurray, Miss Elizabeth D. Minniss, Miss Helen R. Neubauer, Miss Carmela Patorno, Miss Corine E. Ramsey, Miss Vivian M. Sicard, Miss Mittie A. Stockstill, Miss Irene A. Stakes, Mrs. Ada W. Thurber, Miss Beulah M. Triche, Miss Jeanne Vitter, Miss Freda M. Weiser, Miss Nellie Zeigler, Mrs. Mary A. West.

In doing so I desire to voice the sentiment of every member of the Faculty of Lecturers in wishing for them a happy and prosperous future, an abundant field of labor, and the fortitude and good grace to bear with the many trials that may beset them, and that patience and unselfish devotion to duty that find in each trial and each difficulty a source of pleasurable self-sacrifice.

The members of the Faculty have manifested continued interest and given much of their valuable time, and are worthy of commendation for their unceasing efforts in behalf of the School.

And, finally, I desire to mention the names of Sister Mary Agnes, the Directress, and Sister Dolores, the Superintendent, on whose shoulders falls the responsibility of training and caring for this great band of young women. They are the life and sinew of the School, and to them belongs the credit for the splendid achievements of which this is the crowning event.

Respectfully submitted,

J. A. DANNA, M. D.,

Chairman of the Faculty.

Old Sinuses	1			1	Various.
Sinus of Lower Jaw	1			1	After Incision.
Ulcer of Face	1			1	
Ulcer of Forearm	1			1	
Ulcer of Leg	2			2	Various.
Tibia	1			1	Abscess of Leg.
Tibia	2			2	Infected Railroad Injury.
Os Calcis	1	1		2	Necrosis.
Hands		1		1	Blastomycosis.
Rectal Ulcers Cauterized	5	4		9	
 Gynæcological—					
Alexander's Operation	1			1	Retroversion of Uterus.
Amputation of Cervix	37	1	1	39	Various.
Cauterization and Zink Paste		12	1	13	Carcinoma of Cervix.
Excision	6			6	Caruncle of Urethra.
Cauterization	1	1		2	Chancroids of Vulva.
Colporrhaphy	11			11	Various.
Curettage, Uterine	226			226	Endometritis (Many with other Operations).
Curettage, Uterine	40		3	43	Puerperal (Deaths from Septicæmia.)
Excision and Cauterization	1	1		2	Veneral Warts.
Curettage, Uterine	1			1	Menorrhagia.

LIST OF THE MORE IMPORTANT SURGICAL OPERATIONS—Continued

Operation	Results				Total	Diagnosis. Remarks.
	Cured	Improved	Stationary	Died		
Gynæcological—Continued.						
Excision of Cliteris						Elephantiasis.
Excised from Labium Major	1				1	Sebaceous Cyst.
Excised Bartholin's Glands	4				4	Vulva-Vaginal Adenitis.
Myomectomy	3				3	Small Fibroids, Etc.
Perineorrhaphy	82				82	Various (Besides those otherwise noted).
Perineorrhaphy and Colporrhaphy	18				18	Various (Besides those otherwise noted).
Trachelorrhaphy	20				20	(Besides those otherwise noted.)
Trachelorrhaphy and Perineorrhaphy	54				54	(Many with other Operations.)
Recto-Vaginal Fistula	4				4	
Vesico-Vaginal Fistula	8				8	
Vesico-Intestinal Fistula	1				1	
Rectal Polypus Removed	1				1	
Urethral Cyst Excised	1				1	
Uterine Polypus Removed	6				6	
Partition Incised	1				1	Bifid Vagina.
Vaginal Hysterectomy	1				1	Procidentia.
Vaginal Incision	21	5			26	Pelvic Abscess.
Watkin's Operation	4				4	Retrovision of Uterus.
Genito-Urinary—						
Cauterization (Some also Curetted)	16	5	1		22	Chancroids.
Circumcision	132				132	Phimosis (Some Chancroids).

External Urethrotomy	2			Fistula of Urethra.
External Urethrotomy	28	11	1	Stricture.
External Urethrotomy	7	3		Stricture with Extravasation.
External Urethrotomy	6	1		Rupture of Urethra.
Incisions	1			Abscess of Scrotum.
Incisions	1			Prostatic Abscess.
Internal Urethrotomy	13	3		Stricture.
Hydrocele of Tunica Vaginalis	23			
Hydrocele of Cord				7
Partial Amputation of Penis	7			
Epidural Injection	2	2		4 Malignant Growths.
Aspiration	1			1 Incontinance of Urine.
Circumcision and Cauterization		1		1 Hydrocele.
Epispadias	1			1 Epithelioma of Penis.
Plastic Work on Urethra	1			
Nephrotomy	2	1		1 Hypospadias.
Nephrotomy	2			3 Abscess of Kidney.
Nephrotomy	1			2 Nephrolithiasis.
Nephrectomy		1		1 Hydronephrosis.
Nephropexy	8			1 Tuberculosis of Kidney.
Orchidectomy	9			8 Nephroptosis.
Perineal Prostatectomy	1		1	9 Various.
Suprapubic Prostatectomy	6	5	3	2 Hypertrophy of Prostate.
Suprapubic Cystotomy	2		1	14 Hypertrophy of Prostate.
Suprabubic Cystotomy	7			3 Cystitis Chronic (with Retention, Etc.).
Varicocele				7 Vesical Calculi.
Dilatation of Urethra	23			
	3	1		23 Stricture.
 Eye—				
Cataract	16	9		25 Mostly Senile.
Cataract, Congenital	3			3 (One Double.)
Enucleation of Eye	18	5		23 Various.
Excision of Sac	2			2 Dacro-Cystitis.
Iridectomy	2			2 Infection of Eye.
Iridectomy		1		1 Irido, Cyclitis Chronic.
Iridectomy	2			2 Prolapse of Iris.

LIST OF THE MORE IMPORTANT SURGICAL OPERATIONS—Continued

Operation	Results				Total	Diagnosis. Remarks.
	Cured	Improved	Stationary	Died		
Eye—Continued.						
Plastic Work on Lids	1				1	Various.
Pterygium Removed	1				1	
Miscellaneous—						
Aspiration	1	2	1		4	Knee (Various).
Aspiration		2			2	Tuberculosis of Knee.
Aspiration	1				1	Hematoma of Back.
Cast Applied		1			1	Tuberculosis of Knee.
Cast Applied		1			1	Rheumatism.
Cast Applied	3				3	Genu Varum.
Cast Applied		1			1	Hip Joint Disease.
Cast Applied	1	2			3	Talipes Equino-Varus.
Cauterization	5				5	Ulcer of Rectum.
Craniotomy				1	1	Abscess Cerebral.
Craniotomy	1	2			3	Epilepsy.
Craniotomy			1		1	Idiocy.
Craniotomy		1			1	Cerebral Tumor.
Craniotomy	1				1	Hematoma Sub-Dural.
Craniotomy				1	1	Gunshot Wound, Head.
Craniotomy			1		1	Malignant Tumor of Diploe.
Craniotomy (Some Exploratory)	27	1		3	31	Fractures of Skull.
Craniotomy	1				1	To Remove Blood Clot.

Cheiloplasty					5	1	1	1	6	Hare-Lip.
Dilatation of Rectum					4	5	1	1	11	Stricture (Some with Ulcers).
Endoaneurysmorrhaphy (Matas)					3				3	Popliteal Aneurism (Two Arterio-Venous).
Endoaneurysmorrhaphy (Matas)					1				1	Femoral Arterio-Venous Aneurism.
Endoaneurysmorrhaphy (Matas)					1				1	Posterior Tibial.
Endoaneurysmorrhaphy					1				1	Temporal.
Dilatation of Rectum					2	1			3	Fissure.
Dislocation of Hip					1				1	Reduced.
Dislocation of Shoulder					1				1	Reduced.
Fistula in Ano					11	2			13	Excised, Packed, Sutured, etc.
Fistula in Ano					45	5			50	Incised, Curetted, Cauterized, etc.
Foreign Body (Floating Cartilage) Removed					1				1	From Knee.
Foreign Body (Bullet) Removed					1				1	From Leg.
Foreign Body (Bullet) Removed					1				1	From Elbow.
Foreign Body (Bullet) Removed					1				1	From Scalp.
Foreign Body (Bullet) Removed					1				1	From Shoulder.
Foreign Body (Splinter) Removed					2				2	From Foot.
Foreign Body (Bullet) Removed					1				1	From Forearm.
Hemorrhoids Removed					18				18	Clamp and Cantery.
Hemorrhoids Removed					61				61	Ligation, Suture, etc. (Many in Combination).
Hemorrhoids Removed					5				5	Whitehead Operation.
Thyroidectomy					1				1	Cystic Goitre.
Injection of Osmic Acid					1				1	Trifacial Neuralgia.
Laminectomy								1	1	Fracture of Vertebrae.
Mastoid Operation					15	4			19	Mastoiditis.
Neurectomy					1				1	Branches of Cervical Plexus in Cicatrix.
Neuorrhaphy					1				1	Various.
Orthopedic Redressment						1			1	Talipes Equinus.
Plastic Operation					1	4			5	Gunshot Wound of Face (Recent).
Plastic Operation							5		5	Old Gunshot Wound of Face.
Plastic Operation							2		2	Scrotum.
Plastic Operation							4		4	Injury of Penis.
Plastic Operation							2		2	Cicatrix of Face (Various).
Plastic Operation							1		1	Burns (Various).
Reduction							1		1	Old Dislocation of Elbow.
Reduction					1				1	Old Dislocation of Shoulder.

LIST OF THE MORE IMPORTANT SURGICAL OPERATIONS—Continued

Operation	Results				Total	Diagnosis. Remarks.
	Cured	Improved	Stationary	Died		
Miscellaneous—Continued.						
Reduction (Manual)		2			2	Prolapsed Rectum.
Skin Graft	10	2			10	Cicatrical Contraction after Burns.
Skin Graft	1				1	Ulcer (Various).
Skin Graft	1				1	Machine Injury Forearm.
Skin Graft	1				1	Machine Injury of Leg.
Skin Graft	2				2	Old Railroad Injury of Foot.
Staphylorrhaphy	9	7			16	Cleft Palate.
Suturing of Capsule	6				6	Fracture of Patella.
Thoracotomy	10	10	4	4	28	Empyema.
Thoracotomy				1	1	Abscess of Liver.
Thyroidectomy	1				1	Bronchocele.
Tenorrhaphy	3				3	Various.
Tenotomy			1		1	Infantile Paralysis.
Tenotomy and Redressment	2	4			6	Talipes Equinus.
Tenotomy and Cast	3	4			7	Talipes Equino-Varus.
Tracheotomy	3				3	Foreign Body.
Foreign Body (Needle) Removed	2				2	From Thigh.
Resection Second Division of Nerve	1			1	1	Trifacial Neuralgia.
Decapsulation of Kidneys				1	1	Acute Paranchymatous Nephritis.

SUMMARY OF OBSTETRICAL CASES IN 1910 AS PER
HISTORIES FILED IN RECORD-ROOM.

There were 365 obstetrical cases delivered in the Hospital in 1910.

MANNER OF DELIVERY.

Naturally	339
By forceps	18
By podalic version	8
	<hr/> 365

There were two cases of twin pregnancy.

There was no case of triplets.

MORTALITY OF MOTHERS.

Of the 365 maternity cases delivered in the Hospital 5 died, a mortality of 1.3+ per cent.

CAUSES OF DEATH.

Eclampsia	1
Pneumonia	2
Shock (one of the cases of twin pregnancy)	1
Septicæmia (colored patient admitted in labor)	1
	<hr/> 5

The number of children born was 367.

REPORT
OF
RECORD ROOM
FOR THE
YEAR 1910

REPORT OF RECORD ROOM FOR THE YEAR 1910.

N. B.—These tables show the number of cases actually filed in the Record Room during the year. Each case is filed under its principal diagnosis, though death may occur from a complication, as shown by notes.

MEDICAL DIVISION.

† Pneumonia.

Puerperium, Normal	3	7	10	3	7	10	1					1	1
Puerperium, Eclampsia	2		2										
Puerperium, Post-partum Hemorrhage	1	1	2	1	1	2							
Puerperium, Retained Placenta, etc.	5	1	6	5	1	6							
Puerperium, Septicæmia	14	3	17	8	2	10						6	*1

* Only one, a negress admitted in labor, delivered in Hospital.

NEW-BORN CHILDREN—

New-Born Males	70	82	152	70	82	152							
New-Born Females	70	92	162	70	92	162							
Prematurity (one from outside)	7	7	14	2		2	1		1				
Still-Born Males	10	13	23							10	13	23	
Still-Born Females	5	12	17							5	12	17	

NOT BORN IN HOSPITAL—

Children detained with mothers	29	9	38							29	9	38	
Foundling	1		1							1	1		

(Note as to deaths among New-Born Children.) Infants delivered alive, at or near term, are technically "Cured." Of those thus recorded in 1910 ten subsequently died of intercurrent diseases and conditions, and are registered as deaths under proper diagnoses, viz.:

From Atelectasis Pulmonum	6
From Congenial Malformation of Heart	1
From Hemophilia	1
From Inflammation of Thymus Gland	1
From Broncho-Pneumonia	1
Total	10

RECAPITULATION FOR THE YEAR 1910.

	Totals	Cured	Improved	Stationary	Died
Cases Filed, Medical.....	4,537	1,353	1,235	887	1,062
Cases Filed, Surgical.....	5,001	2,078	1,922	541	460
Cases Filed, Gynecological.....	907	518	203	159	27
Cases Filed, Obstetrical.....	975	783	12	150	30
Apparent Totals.....	11,420	4,732	3,372	1,737	1,579
Deduct for Duplicates†	10	10			
Actual Totals.....	11,410	4,722	3,372	1,737	1,579

Detained with Mothers, 38. Still-Born, 40. Coroner's Cases, 224.

† Duplicated cases are new-born infants originally registered as "Cured",—i. e., delivered alive—but which subsequently died of intercurrent diseases and conditions.
